B.Sc. Mathematics, Statistics & Computer Science(MSCS)

Programme Specific Outcomes(PSOs)

PSO1: Understanding the nature and scope of the subjects and basic concepts and terminology of three courses of the program.

PSO2: Analysis, compare and Construct the concepts in all three courses and to draw conclusions effective manner.

PSO3: Analytical skills, mathematical modeling, data computation using statistical tools and computer programming knowledge is required.

PSO4: Applications of mathematics, Statistics and Computers are necessary to draw conclusions for a given problem through MS Excel and other softwares.

PSO5: To develop Research thinking in students to collecting the data and solving practical science problems
