A Message From the Principal

Quality concerns in education are of national priority. Quality dimension in education includes multiple perspectives such as good governance, quality of teaching learning process, quality of research and consultancy, quality of academic programmes, quality of infrastructure, quality of faculty etc. Resource mobilization is also important.

Vast potential of human resource is available in the College. With the young, energetic, enthusiastic students and a strong team of committed faculty members, the college should be vibrant in academic activity, research and collaborations, co-curricular and extracurricular activities and Community Service. If effort is made, excellence is very much within the reach of every higher education institution.

Alumni interaction is important for the benefit of the students, namely for conducting viva, conducting mock personal interviews, discussing business and entrepreneurship opportunities. During the interaction alumni have highlighted the importance of current trends in the market and guided the students about the career opportunities in different fields. They have also shared their personal experiences with students.
