Creative Corner Board Activity by Electronics

Students on 13-09-2017

The objective of this activity was to encourage students to use their creativity and improve their English language skills. The activity involved creating a board that showcased the students' creative writing, artwork, related to English language learning under the guidance of an ILM English Communication Skills Trainer.

The activity began with a brainstorming session where the ILM English Communication Skills Trainer and the students discussed different themes and ideas for the board. The students were encouraged to share their ideas and suggestions for the board.

Once the themes were decided, the students were divided into groups and each group was given a specific section of the board to work on. The sections included vocabulary building, grammar rules, creative writing.

The students then worked together to create their section of the board. They used different materials such as chart paper, markers, and colored pencils to create their displays. The ILM English Communication Skills provided guidance and support to the students throughout the activity. Once all the sections were complete, the students came together to assemble the board. The sections were arranged in a way that made sense and was visually appealing.
